### **REASONS FOR ALLOWANCE**

1. The following is an examiner's statement of reasons for allowance:

The prior art of record fails to teach and/or suggest a method of reforming diesel fuel by supplying diesel fuel to a fractional distillation device connected to a reformer and fractionally distilling the diesel fuel to produce a light fuel stream and a heavy fuel stream and reforming the light fuel stream in the reformer to produce a reformat. Although it is known to fractionally distill heavy fuels, to separate the fuels into multiple fractions, it is not known to fractionally distill a diesel fuel by and of itself for the purpose of separating the diesel fuel into a light fuel stream and a heavy fuel stream and then directing the light fuel stream to be reformed. The closest prior art shows that it is known to direct a diesel fuel directly to a reformer, but there is not any mention or motivation for fractionally distilling the diesel fuel prior to the reforming, to separate out the heavy fuel stream prior to the light fuel stream going to the reformer. Such a procedure is not taught or suggested for the purpose of generating an even more pure product that will reduce sulfur contamination into the air (pollution control) and at the same time allows the reformer to more easily reform the product being introduced.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
